Vice-Chancellor's Message

Dear Graduands, Esteemed Guests, Faculty and Friends,

It is my great honour to welcome you all to this momentous occasion, convocation of the Open University of Sri Lanka (OUSL) 2024. Today, we come together to celebrate the culmination of your academic journey and the beginning of new adventures that lie ahead.

Convocation is a milestone in your life, marking the successful completion of years of hard work, perseverance, and dedication. It is also a celebration of the values and knowledge that you have gained at the OUSL, which will serve as a compass guiding you through life's challenges and opportunities.

As you step beyond the gates of this institution and venture into the wider world, remember that you carry with you not just a degree but a legacy of excellence, integrity, and service. You are now ambassadors of the OUSL and we trust that you will lead with wisdom, compassion, and courage, making meaningful contributions to society.

To our faculty and staff, thank you for your unwavering commitment to shaping the minds and nurturing the potential of our students. Your guidance has been instrumental in their success.

To the families and friends gathered here, your support and encouragement have been invaluable on this journey. Today, we share in your pride and joy as we witness the remarkable achievements of your loved ones.

Graduands, as you leave this chapter behind, remember that learning is a lifelong endeavour. Embrace change, seek knowledge, and strive for excellence in everything you do. The world is ever evolving, and your resilience, adaptability, and innovative spirit will be your greatest assets.

On behalf of the OUSL, I extend my heartfelt congratulations to each of you. May your future be filled with success, fulfillment, and boundless opportunities.

Go forth with confidence and make us proud!

With best wishes for your journey ahead.

Senior Professor P.M.C. Thilakerathne
Vice-Chancellor

THE OPEN UNIVERSITY OF SRI LANKA
GENERAL CONVOCATION – 2024(I)
CONVOCATION ADDRESS

BY

Prof. K. P. S. Chandana Jayaratne

Professor in Physics

Head of the Department of Physics and Director, Astronomy and Space Science Unit,
Department of Physics, University of Colombo

Former Chairman, Arthur C Clarke Institute for Modern Technologies (ACCIMT)

Former Acting Chairman, National Research Council (NRC)

Past General President, Sri Lanka Association for the Advancement of Science (SLAAS)

Editor-in-Chief, Journal of the Sri Lanka Association for the Advancement of Science

FIP(SL) and Chartered Physicist, Ph.D in Atmospheric Physics (University of Colombo),
PGD in Counselling (University of Colombo), BSc Special Degree in Physics (Honours)

Esteemed Chancellor, Honorable Vice-Chancellor, Distinguished Guests, Faculty Members, Graduands, and Families,

A very good morning to all of you.

It is a great honour to stand before you on this momentous occasion as we gather to celebrate the achievements and the success of the graduands of the Faculty of Science at the Open University of Sri Lanka. Today marks not only the culmination of years of hard work, dedication, and perseverance, but also the beginning of new journeys, where knowledge will be your guide, and wisdom will be your companion.

First and foremost, my heartfelt congratulations to each and every graduand. Today is your day – a day that celebrates your intellectual curiosity, your passion for learning, and your unyielding commitment to your goals. Earning a degree in science is no small feat; it requires determination, critical thinking, and the ability to push through

challenges. This convocation will confirm that you have acquired the tools that will enable you to navigate the complexities of the world around you. You should be immensely proud of yourselves.

However, you have a big challenge in front of you. You have to keep your knowledge updated and continuously attend professional development courses in the upcoming decade to secure your job. The reason is that the world is stepping into the 5th Industrial Revolution.

Prior to 1760, the world's population was totally insular, living in closed communities with limited skill sets and food supplies, following family traditions with no thought of change.

The First Industrial Revolution (1760–1840): Mechanical Production. Starting in the UK, with the invention and refinement of the steam engine and steam power, agriculture boomed, and food supplies fueled population increases, leading to the development of new markets. Allowing factories to spring up everywhere, Cities were created, full of consumers and the growth of the railroads allowed even further expansion and urbanization. Agriculture was abandoned in favor of the production of goods in the forms of textiles, steel, food and more. New jobs were created, and the media, transport systems, medical services - everything was reinvented, and everyday life was transformed.

Second Industrial Revolution (1870–1914) - Mass Production. This era introduced assembly lines, electricity, and innovations such as the telephone, internal combustion engine, and chemical manufacturing. It fostered the growth of large-scale industries and global trade networks.

Third Industrial Revolution (1960s–2000s)- The Digital Age. The usefulness of the silicon wafer was discovered, leading to the development of semiconductors and mainframe computers, evolving into personal computers in the 1970s and 1980s. With the growth of the internet and the World Wide Web in the 1990s, the computer, or digital, revolution was well underway, internationally.

Fourth Industrial Revolution (2010s-2020) -The Smart Factory. Defined by advancements in artificial intelligence, robotics, biotechnology, and the Internet of Things (IoT), this revolution integrates physical, digital, and biological systems. It transforms industries with smart technologies, big data, and automation, reshaping the future of work and innovation.

Fifth Industrial Revolution : We are now stepping into the 5th Industrial Revolution – human-robot collaboration, cognitive systems, and customization,

Each revolution has reshaped humanity's relationship with technology, driving progress while posing new challenges for society.

However, with the development of Automation and Artificial Intelligence, it is said that 70 % of the jobs that we are having today will disappear in the next two decades and people with the current education system will have no jobs. Among the large number of jobs that are under threat are bank tellers, financial analysts, farmers, drivers, manufacturing workers, journalists, movie stars and even medical doctors. For example, vehicles will go without drivers in future and instead of driving, the drivers should change their job to repair those automated cars or instruments, robotics etc. But this needs education. This is the challenge that your generation will have. Learn new things, concentrate on STEM education, and register for new postgraduate degrees. The Open University, with its flexible education structure, is the best place for your survival and future development.

You, the graduands of the Open University of Sri Lanka, have shown what it means to pursue knowledge with passion and dedication. Go forth with confidence, knowing that you are equipped to face the challenges of tomorrow.

Once again, congratulations to all of you! May your future be filled with success, fulfilment, and the drive to make the world a better place through science.

Thank you.
