

Prerequisites

To offer courses one has to satisfy the prerequisites for each course. These pre-requisites are given in the above Table.

Industrial placements

It is mandatory for you to complete a minimum period of 6 month industrial training at a software company. From this placement, students gain on-site experience by working alongside professionals and the opportunity to observe good practices as well as developing necessary skills to work as a software engineer.

The Department is working closely with the Sri Lanka Association for Software and Service Companies (SLASSCOM) to give you an opportunity to do your training in the best software companies in the country. SLAASCOM has informed its member companies to offer training placements for OUSL students. The University facilitates the process by forwarding student CVs to a number of companies through SLAASCOM. The actual selection criteria are decided by the companies themselves. Generally this involves a technical test and/or an interview.

Alternatively, if you are already employed or have found a training placement on your own at a company, discuss with the Manager/CITES. If the credentials of the company are acceptable to the University, you will be allowed to carry out training at the company. For claiming exemption for training based on working experience you have to offer the course ***EEW5811***
